Volume 30: Subject index

Abbreviations:—'(P)' refers to summaries of papers read at General Meetings of the Association of Clinical Pathologists or at other meetings or symposia. '(L)' refers to letters to the Editor.

Abscess, Bartholin's, bacteriological findings in cultures of clinical material from, **1025**
3-Acetylpyridine-adenine dinucleotide and centrifugal analyser, blood lactate assay using, **587**
Acetyltransferase, overnight plate diffusion and 40°C Klebsiella gentamicin assays of clinical serum samples, **521**
Achromobacter xylosoxidans strains from clinical material, **595**
Acinar cell neoplasms of exocrine pancreas, **103**
Acinetobacter strains, differentiation of, evaluation of β-D-xyloside xylohydrolase test for, **838**
Acrodermatitis enteropathica, zinc and di-iodohydroxyquinoline therapy in, **284**
Actinobacillus actinomycetemcomitans, subacute bacterial endocarditis due to, **842**
Actinomyces viscosus, isolation from 2 patients with clinical infections, **518**
Adenocarcinoma and villous lesions in large intestine, interpretation and diagnosis by new histochemical technique, **1056**
——, cribriform, morphology and natural history, **195**
Adrenocortical hyperactivity with disseminated malacoplakia, **206**
Aesculin hydrolysis and inositol fermentation, complementary use in characterisation of Klebsielleae, **45**
Agar plates, antiserum, for serogrouping of meningococci, **834**
Agglutination tests with avian erythrocytes on sera of bird fanciers, **29**
Albumin, dimeric, *in vitro* inactivation of human brain creatine kinase by (L), **684**
Alcoholic liver disease, aminopyrine breath test in, **1040**
Allograft heart valve structure and function, canine, influence of viability (P), **96**
Alpha chain disease, 2 cases from Nigeria, **678**
Alpha$_1$-fetoprotein. *See* α_1-Fetoprotein
Alveolar rhabdomyosarcoma presenting as subacute intravascular coagulation, **661**
Aminoglycoside antibiotics, cross-resistance patterns of gentamicin-resistant bacteria, **738**
—— ——, effect on urinary γ-glutamyltransferase excretion and renal function, **432**
—— ——, enterococci resistant to, **375**
Aminopyrine breath test in alcoholic liver disease and in patients taking enzyme-inducing drugs, **1040**
Amphotericin B and flucytosine treatment in cryptococcal meningitis complicating systemic lupus erythematosus, **254**
Anaemia, dyserythropoietic, congenital, response to splenectomy and quantitation of ineffective erythropoiesis, **184**
——, haemolytic, auto-immune, complicating infectious mononucleosis in hereditary elliptocytosis (P), **97**
Anaerobes, Gram-negative, identification by API ZYM system, **505**
Anaerobic bacteria, non-sporing, identification of, **991**
—— ——, recovery from small inocula as model for blood culture studies, **609**
—— bacteriology in hospital laboratory, improvement in, **157**
—— jar, Whitley, **1082**
Angina and myocardial infarction, catecholamines and free fatty acids in, **1037**
Antibacterial drugs, assay with *Bacillus stearothermophilus* (L), **1178**
Antibiotic activity, *in vitro* tests of (P), **784**
—— susceptibility testing by rotary inoculator (L), **683**
Antibiotics, *Staphylococcus aureus* resistant to, in dermatology and burn wards, **40**
——. *See also* Aminoglycoside antibiotics
Antibodies, antitetanus, suitable for human antitetanus immunoglobulin production, screening of blood donors for, **177**
——, heterophile, immunofluorescent, characterisation and possibility of confusion with autoantibodies, **299**
——, rubella haemagglutination inhibiting, new test system for, evaluation of, **1011**
—— to double-stranded (native) DNA, standardised assay for measurement of, evaluation of, **827**
Antibody, anti-N, induced by formaldehyde, role in causation of renal graft failure, **956**
——, hepatitis B. *See* Hepatitis B surface antibody
——, IgM, serum, and influenza A infection, **723**
—— to factor VIII, and pregnancy, **928**
—— —— —— ——, serial plasmapheresis in haemophiliac with, **763**
—— to hepatitis B core antigen, screening test for, **709**
Anticoagulants in preservation of prothrombin time specimens, comparison of, **766**
Antigen, carcinoembryonic, and other products, immunoperoxidase technique for demonstration of, **138**
——, ——, in thyroid disease, **878**
——, e. *See* e antigen
——, *E. coli* K1, isolated from blood and CSF, incidence in United Kingdom patients, **945**
——, hepatitis B core. *See* Hepatitis B core antigen
——, —— —— surface. *See* Hepatitis B surface antigen
Antigens, polysaccharide, capsular, of groups A and C meningococci and *Haemophilus influenzae* type b in CSF, radioimmunoassay of, **831**
Anti-N antibody induced by formaldehyde, role in causation of renal graft failure, **956**
Antiseptics in labour, efficacy of, 'dip-slide' method of sampling bacteria for measurement of, **989**
Antiserum agar plates for serogrouping of meningococci, **834**
Antistreptolysin activity, monoclonal immunoglobulins with, clinical and laboratory study of 2 cases, **851**
Antitetanus antibodies suitable for human antitetanus immunoglobulin production, screening of blood donors for, **177**
Antithrombin activity, determination of, standardisation of method for, **881**
α_1-Antitrypsin bodies in liver, **132**
—— globules in liver and PiM phenotype, **464**
API (20E), Enterotube and Pathotec systems for identification of Enterobacteriaceae and other bacteria, test reproducibility of, **381**
API ZYM system for detection of bacterial enzymes, **275**
—— —— —— in identification of Gram-negative anaerobes, **505**

Appendix, *Streptococcus milleri* in, **937**
Arboviruses, indicator, sensitive, detection of residual lipoprotein inhibitors of haemagglutination in rubella virus serology with, **409**
Arthritis, rheumatoid, lymphocyte tubular structures in, **822**
Aspergillus fumigatus precipitins, detection of, comparison of counterimmunoelectrophoresis and double diffusion test for, **388**
Association of Clinical Biochemists: Reports and Bulletins, **183, 261, 349, 437, 634, 727, 889, 955, 1076**
Association of Clinical Pathologists: 97th General Meeting, **96**
—— —— —— ——: 99th Spring Meeting, **784**
Astrovirus infection associated with gastroenteritis in children's ward, **948**
Attwood's stain, modified, application to study of decalcified bone sections, **900**
Autoantibodies, possible confusion of immunofluorescent heterophile antibodies with, **299**
Autoantibody, smooth muscle, reaction with gastric parietal cells, and diagnosis of parietal cell autoantibody, **666**
Autoclave, steam and formaldehyde, low-temperature, processing of urinary endoscopes in, **269**
Auto-immune haemolytic anaemia complicating infectious mononucleosis in hereditary elliptocytosis (P), **97**
Automated continuous-flow assay and radioassay for serum folate, comparison with tube assay, **1175**
—— red cell indices and marrow iron reserves in geriatric patients, **353**
Automation, continuous-flow, of *Lactobacillus casei* serum folate assay, **1168**
—— of rapid plasma reagin test with Autotape System, **171**
Avian erythrocyte agglutination tests with sera of bird fanciers, **29**

Bacillus stearothermophilus assay of antibacterial drugs (L), **1178**
Bacitracin inhibition test for presumptive identification of Lancefield group A streptococci, reliability of, **421**
Background staining in immunoperoxidase method, reduction by digestion technique, **88**
Bacteria, anaerobic, non-sporing, identification of, **991**
——, ——, recovery from small inocula as model for blood culture studies, **609**
——, contaminant, multiplication in urine, and interpretation of delayed culture, **615**
——, gentamicin-resistant, aminoglycoside cross-resistance patterns of, **738**
——, Gram-negative, identification in histological sections with Sandiford's counterstain, **290**
——, identification of, test reproducibility of API (20E), Enterotube and Pathotec systems for, **381**
—— sampling, 'dip-slide' method of, for measurement of efficacy of antiseptics in labour, **989**
Bacterial capsular polysaccharide, demonstration in CSF by counter immunoelectrophoresis (L), **291**
—— endocarditis, subacute, due to *Actinobacillus actinomycetemcomitans*, **842**
—— enzymes, detection by API ZYM system, **275**
—— flora of vagina and cervix, **745**
Bacteriological findings in cultures of clinical material from Bartholin's abscess, **1025**
Bacteriology, anaerobic, in hospital laboratory, improvement in, **157**
Bacteriuria, significant, screening with Coulter counter for, **1158**
Bartholin's abscess, bacteriological findings in cultures of clinical material from, **1025**
Behçet's disease, polymorphonuclear leucocyte function in, **250**
Belgium, training of pathologists in, **789**
Beryllium workers, detection of hypersensitivity in, and diagnosis of chronic beryllium disease, role of *in vitro* and *in vivo* tests in, **24**
Biopsies, cervical tumour, Feulgen microdensitometry and analysis of S-phase cells in, **907**
Biopsy, small intestinal, technique for microdissection and measurement in, **1068**
Bird fanciers, avian erythrocyte agglutination tests with sera of, **29**
Birmingham Histopathology Data Pool, co-operation of 10 laboratories, methods and results in, **1110**
Blood and cerebrospinal fluid, *E. coli* K1 antigen isolated from, incidence in United Kingdom patients, **945**
—— cell counters. *See* Coulter counter model S, Hemac 630L, Hemalog D . . . counter
—— collection and centrifugation, disposable plastic syringe for, **288**
—— culture studies, recovery of anaerobic bacteria from small inocula as model for, **609**
—— donors, hepatitis B surface antibody in, micro haemagglutination inhibition technique based on Hepatest for detection and quantitation of, **50**
—— ——, screening for antitetanus antibodies suitable for human antitetanus immunoglobulin production, **177**
—— ——, —— for IgA deficiency, donor population study in S.W. England, **1007**
—— ——, serum gamma-glutamyl transferase activity in (L), **779**
—— films, peripheral, produced by haemotrace, evaluation of (P), **98**
—— lactate assay with centrifugal analyser and 3-acetylpyridine-adenine dinucleotide, **587**
——, lymphocyte population with distinctive morphology and other characteristics in, **243**
——, peripheral, leucocyte counts below $2{\cdot}0 \times 10^9$/l, comparison of visual and Coulter counter model S methods for, **1005**
—— platelet. *See* Platelet
—— vessels, occlusion of, and local exercise, effect on fibrinolytic activity, **350**
Body weighing machine, **1086**
Bone, flucloxacillin in (P), **785**
—— marrow. *See* Marrow
—— sections, decalcified, study of, application of modified Atwood's stain to, **900**
